How to translate the BridgeTab

A. Install XML editing software

- 1. Download XMLFox here: http://xmlfox.com/XMLFox.zip
- 2. Unzip the file and double click XMLFox.exe

3. Complete the install.

B. Translate

1. Open XMLFox

2. Open the language file (strings.xml)

😽 Ne	w1.xml - XMLFox			The second		
File	Tools Help					Convert XML to HTML, Excel, PDF, CSV, TXT
10	New		Script	Tree	Grid	
1	Open	F2	ersion="1.0" encoding="UTF-8" standalone="yes" ?>			
	Close		Lated W	ith XMLF	xo	>
	Carro	C+rl+S	e>New X	ML <th>></th> <td></td>	>	

3. Switch to grid mode

File Tools Help	Convert XML to HTML, Excel, PDF, CSV, TXT)
凾 🗈 🛩 🖬 🚑 🐰 🎙	View Script Tree Grid
Schema: Schema: Complex Type Complex Type Choice String Comp String String String String	<pre><?xml version="1.0" encoding="utf-8" standalone="no" ?> - <resources> <!-- INSTRUCTIONS--> <!-- Translate the parts that you wish to have in your own language. Make sure to NOT change the name="" part - <! Example: To change the text "South" to the french "Sud" change <string name="south"-->South to </resources></pre>

4. Open the text strings by clicking string

5.Translate the text in the right column (string_Text).

IMPORTANT:

Do not change anything in the left ("name") columnDo not translate words that end with activity, e.g. "TableActivity"
